

# PHOTOSYNTHESIS

In the garden, green and bright,  
Plants catch sunlight with all their might!  
Their leaves reach out, open wide,  
Where magic happens deep inside.  
Cottontail the rabbit, with a twitching nose,  
Breathes out **CO<sub>2</sub>** wherever he goes!  
The plants take it in, what a treat,  
Turning **sunbeams** into something sweet.  
They make **sugar** for their energy,  
And release fresh **oxygen** for you and me,  
A perfect team for the world to see!

SUNLIGHT + NUTRIENTS + SUNLIGHT → SUGAR + OXYGEN
